Mr. Ron B. Schiller, W2JCO
Box 456
Monmouth Beach
N. J.
U. S. A.

Dear Mr. Schiller:

Your reception report came in the mail this morning and, as the chap who usually handles this end of things happens to be away, I'll take on the task of confirmation.

You are quite correct in logging CBD at 1110 kcs as indicated. By that time we are getting ready to change from our night-time pattern (about North-North-East) to our day-time pattern (same direction but less severe) so it is interesting that you should hear us before the shift.

If you get a clear reception report some time when WBT is down we would be most pleased to get it, and will certainly confirm. I don't have to tell you how much ham and SWL reports mean to those of us in the game professionally - this is one 'rating' which is strictly above suspicion!
